

Advantages and Benefits of the ABP assembly technology

The machines of the ABP Mod 2xxx be prefabricated on a glass fiber reinforced and heat-resistant plate, thus:

1. Short delivery times for customized housing
2. At the end of manufacturing, the housing decision can be made
3. Maximum use of the housing. Instead of a three-liter water tank, a six-liter water tank can be used
4. Increased protection against break-through case back
5. Extremely friendly service. By simply removing of only four base screws, the entire unit can be lifted for difficult service work out of the housing
